Quantum Energy and Sustainable Solar Technologies (QESST) Engineering Research Center is a National Science Foundation (NSF) and Department of Energy (DOE) -funded Engineering Research Center located on the campus of Arizona State University.

QESST offers undergraduates from accredited universities the opportunity to participate in solar energy research. As a participant you will:

- work in the largest silicon solar cell fabrication laboratory in the country.
- take an active role in research as part of the student-oriented laboratory.
- present your research to leaders in the photovoltaic community.

**Program Details**

- Stipend and travel reimbursement provided
- Housing provided to out-of-state participants
- Eight week summer program
- 40 hours per week
- Must be a U.S. citizen or permanent resident to apply

**Application Deadline:** March 15, 2016

[Apply online at: qesst.asu.edu/reu](http://qesst.asu.edu/reu)
